

PRODUCT RANGE

Hi-fi doesn't have to be plain and ordinary, at least we don't think so. That's why we've designed a whole product ecosystem with a beautiful industrial aesthetic to suit any environment, from showroom to yacht, home to studio. You can search our full product range below.

MOBILE

Introducing our newest range, Mobile. This is our pocketable and truly portable device range with a single modular DAC/headphone amp at its heart, supported by a range of modules and accessories.

QUTEST

Qutest is our most compact standalone DAC with unique casework that sets it apart from other Chord ranges. With big-box performance from a bijou package, Qutest is at home both in desktop and home system environments where it brings the very latest digital conversion technology to partnering devices.

HUGO

Hugo is our most powerful and flexible portable/tabletop DAC/headphone amp range. We've combined elements from our reference DAC technology with the latest battery advances and added a comprehensive input and output selection, to introduce the benefits of a full-size system, but in a convenient and compact chassis.

TABLE TOP

The Table Top range merges technological influences from both the multi-award winning Hugo and Choral ranges. It presents class leading products for headphone listeners, along with legendary Chord Electronics amplification performance for users where space is at a premium.

CHORAL

For those who demand the power and resolution that only Chord Electronics' components can deliver and need a more design-led aesthetic, the compact Choral range is sure to set hearts racing. The stylishly beautiful Choral line offers an entire ecosystem with extraordinary flexibility, performance and visual appeal.

FULL SIZE

The signature Chord line is a supremely reliable, effortlessly powerful and wonderfully transparent full-size range sporting the classic industrial aesthetic from which the company was founded upon. Our Signature Chord range continues to be updated and enjoys legendary status amongst music lovers and studio professionals around the world, with its class-leading performance and durability.

REFERENCE

Reference offers our finest engineering, measured performance and sound quality. The range encompasses our best of our expertise and proprietary technologies, and demonstrates what can be achieved with a true no-compromise approach to design and engineering. Reference offers unadulterated music playback: nothing is added, and nothing is taken away.
